

1633 Light Chrome Yellow

(Pigment Yellow 34)

Molecular Formula : $PbCrO_4$

CAS No: 7758-97-6

Specifications:

Colour (compare with standard)	approx
Hiding strength	75% min
Content of $PbCrO_4$	60% min
Oil absorption	30g/100g max
Moisture	2.0% max
Water soluble	1.0% max
Ph value	4 - 7
Res.on 320 mesh	0.5% max

Applications:

With high hiding, strong tinting strength, good weathering resistance and heat resistance, Lead Chrome Yellow is widely used in coating, paint, printing ink, plastic and rubber industries.

Packing:

In 25kgs paper bags.
